Additional comfort for  
everyday operation

# Schindler Office Package

## Additional comfort for everyday operation

Mornings, evenings and at lunch time, mobility in a commercial building is a challenge. Our Office Package aids in hassle-free and efficient vertical mobility solutions for office buildings – and maintaining them in top condition.

### Your benefits at a glance

- Extra convenience and performance functions
- Benefit from stress-free operation
- Easy adaptation to your building's system thanks to various pre-installed interfaces

#### The package includes:

##### **CCTV Interface**

- A pre-fitted additional cable, enabling customers to connect their CCTV camera devices instantly.

##### **Pre-opening Doors**

- Elevator doors start to open as soon as they arrive at the opening zone slightly before the elevator fully stops. This feature improves traffic performance, allowing passengers to enter and exit faster.

##### **Car Call Cancellation**

- The floor to which call is given can be cancelled from within the car by pressing the floor button twice, avoiding unwanted or unintended stops.

##### **Attendant Service**

- A lift Attendant can control traffic from inside the car with the attendant key and for manually managing the destination for specific purposes such as movement of special goods, elevator cleaning, etc.

##### **Building Management Interfaces**

- We enable you to monitor the performance and other functions of your elevator by providing pre-installed wiring to connect your own monitoring hardware.

##### **Out of Service**

- The mode is used to take an elevator out of service temporarily for energy-saving, cleaning or other reason..
