Schindler Security Package
Security and peace of mind with your elevator

Make the most of your elevator to optimize tenant security and wellbeing, and as an active agent in combatting burglary and intrusion.

The new Schindler Security Package brings together the most effective and intelligent elevator options for enhancing both tenants' safety in moving through your building to and from their homes, and their security in your building while at home.

Full integration with your building's core security systems, plus features to deter and entrap intruders, and increase landing visibility for tenants.

Your benefits at a glance

– Pre-installed interface to all major card-reader systems
– Integrates elevator with floor and lobby lighting, so hall lights are on when elevator arrives
– Burglar entrapment feature to hold criminals until police can arrive

The package includes:

Access control

– A pre-installed interface to all major card-reader systems for enhanced tenant security.

Automatic floor lighting

– Integration of elevators to floor and lobby lighting, so that tenants always arrive to a fully lit floor.

Automatic return to main floor

– A function where the elevator always returns to and parks at the main floor, reducing waiting times for tenants arriving home, and increasing the perception from outside of more movement inside the building.

Anti-burglar

– A highly valued feature that enables security personnel to hold a burglar or vandal inside the elevator car and bring the car to the floor keeping the elevator doors closed where security person can take further action..
