## We Elevate... Performance

Our elevators and escalators run at maximum efficiency during peak traffic. When traffic reduces, so does energy consumption. Our technology delivers performance without waste, and **we offer flexibility in design, car sizes and control options.**

# Your tenants' safety, comfort and mobility are our commitment to you.

Our elevators and escalators deliver passengers to their offices safely, quietly, efficiently and in comfort something your tenants can take for granted.

**Managing building traffic.** Efficient and smooth mobility in a commercial building is a challenge – and a must! Especially in up-peaks, down-peaks and lunchtimes. The latest generation of our destination control system, PORT Technology revolutionizes the science of optimizing traffic flows through every type and size of commercial building while offering personalized service and access control.

**Visualizing traffic.** Our TrafficVision tool simulates traffic patterns in the building long before construction begins. It identifies bottlenecks, so we can solve them. It also helps optimize handling capacity and reduce waiting times.

**Green buildings.** The highly efficient PORT Technology Destination Control System puts one elevator out of a group in full-sleep mode during off-peak periods with fast re-start. Our regenerative drive systems feed electricity back to the grid without harmonic distortion. Combined with waste management during installation, our systems can contribute substantially to your customers achieving green building certification. Schindler has registered Environmental Product Declarations (EPD) at the "International EPD® System" for all major elevator product lines, taking an important step further in the assessment of the environmental performance of our products, underlining our continuous efforts towards sustainable solutions.

**The perfect fit.** Standard and fully-flexible interior design options to meet all building requirements.

**The right solution.** Passenger and special service elevators for all purposes.

**Security-access control systems.** For office buildings with multiple inter-floor tenants, including hands-free option with key cards/user ID badges.

**Destination control.** PORT destination control for efficient transit management.

**Innovative drive technology.** Our innovative, regenerative drive technology is designed to reduce travel energy by 30% compared to any conventional technology available.

**Availability.** 24/7 service always accessible through our wide network of call centers.

**Reliable operation.** Maintenance services tailored to all specific needs.

**Worry-free modernization.** From complete replacements with minimal building adaptation to tailored phased modernization, we ensure maximum traffic capacity with minimum disturbance during modernization work.

## Schindler Plan & Design tool

### Design your elevator layout in minutes

Our easy-to-use online planning tool makes it simple to find the matching vertical transportation setup for your building. The Schindler Plan & Design tool helps you to prepare specifications in the early stages of your building's project life cycle.

With just a few clicks, we provide you with recommendations, a comprehensive product specification, and detailed layout drawings. Simply download the data straight into your project design in DWG or PDF formats.

The solution can be integrated with Building Information Modeling standards, and our Project Cloud makes it easy for you to share your projects with us.
