We Elevate

Schindler

We Elevate... Your Home.

Developers and owners of residential properties can always count on Schindler for stylish in-building transport that is safe, durable, smooth to ride, and highly efficient. With lighting, fixtures and colors to match the building's architecture, we assure premium mobility for owners, facility managers and residents alike.

Schindler residential elevators – welcome home!

A personal welcome. First impressions count. Our elevators deliver passengers to their homes safely, quietly, efficiently and in comfort – a daily pleasure your tenants can take for granted.

Perfect fit. Residents are the all-important touchstones for elevator performance in any residential building. Schindler helps you plan for capacities in real-world use, ensuring residents do not have unnecessary waiting times.

Easy to plan. Planning a new development or modernizing an existing building? Schindler experts can help you find the best technical and design solution for you and your tenants. And with our exclusive Plan&Design tool, you can do all the initial work yourself – when and where you want.

Meeting standards – and setting new ones. Improving energy efficiency is essential in order to reduce the environmental impact of elevators and the buildings they serve. Eco-friendly features, such as regenerative drive, LED lighting and stand-by mode while parked are standard in order to reduce the total energy consumption, achieving best-in-class energy efficiency ratings. To provide an insight into the ecological performance of our elevators throughout their life, we provide Environmental Product Declarations (EPD). Schindler has registered EPDs at the “International EPD® System” for all major elevator product lines, taking an important step further in the assessment of the environmental performance of our products, underlining our continuous efforts towards sustainable solutions.

Silent operation. Schindler’s Swiss-engineered elevators are designed for excellent ride quality and minimum noise. For your residents, that means seamless mobility with no complaints – not even from rooms next to the shaft.

For all applications. Standard and customized solutions for low- to high-rise buildings, with pre-designed and custom interiors.

Accessible mobility. Our barrier-free elevators provide accessible mobility for passengers with or without disabilities.

There for you. Support with layouts, capacity planning and traffic simulations, including calculation of energy use.

Reliable operation. Maintenance plans with options for all building sizes.

Optimized space. Shaft and headroom parameters to meet modern architectural requirements, plus a full range of machine room-less solutions.

Availability. 24/7 call centers and service availability as required.

Worry-free modernization. From complete replacement with minimal building adaptation to tailored phased modernization, we ensure maximum traffic capacity with minimum disturbance during modernization work.

Products and packages

Schindler Plan & Design tool

Design your elevator layout in minutes

Our easy-to-use online planning tool makes it simple to find the matching vertical transportation setup for your building. The Schindler Plan & Design tool helps you to prepare specifications in the early stages of your building's project life cycle.

With just a few clicks, we provide you with recommendations, a comprehensive product specification, and detailed layout drawings. Simply download the data straight into your project design in DWG or PDF formats.

The solution can be integrated with Building Information Modeling standards, and our Project Cloud makes it easy for you to share your projects with us.
