Retail

We Elevate... Shopping Experiences

We have decades of expertise in realizing and renovating time sensitive retail projects. Over the years, we have developed proven tools for planning elevator and escalator layouts, capacities and energy consumption. So your shoppers can enjoy optimum reliable mobility in comfort and style.

Moving shoppers through malls – quickly, comfortably and safely

Our elevators and escalators deliver passengers to shops in quiet comfort, helping to make that retail experience a memorable one.

Smooth traffic flow. Our escalators and elevators transport shoppers to shops quickly. We share a common goal to keep people moving – especially at peak times such as weekends and holiday periods.

Keeping crowds moving. You need to move thousands of shoppers in and out of your buildings as smoothly as possible. We can help you with early planning, finding the right product and estimating its energy consumption. We assign an experienced project manager dedicated to your project to make sure everything goes without a hitch.

Accurate accessibility. Our products are safe, easy-to-use and are also suitable for the disabled. The Schindler Damage-Resistant Package is an added option, ensuring long-term operational efficiency.

Efficient operation. Improving energy efficiency is essential in order to reduce the environmental impact of elevators and the buildings they serve. Eco-friendly features, such as regenerative drive, LED lighting and standby mode while parked are standard in order to reduce the total energy consumption, achieving best-in-class energy-efficiency ratings. To provide an insight into the ecological performance of our elevators throughout their life, we provide Environmental Product Declarations (EPD). Schindler has registered EPDs at the “International EPD® System” for all major elevator product lines, taking an important step further in the assessment of the environmental performance of our products, underlining our continuous efforts towards sustainable solutions.

Optimal solutions. We offer full support and consultancy for traffic evaluation and planning early on for the best possible handling capacity.

Perfect fit. Passenger, freight and special elevators, and escalators – all for heavy traffic.

Reliable operation. 24/7 service availability, monitoring tools and special service attendance.

Security. Access control systems for back-office and goods elevators.

Easy operation. Easy-to-clean, durable equipment for trouble-free operation without interruptions.

Energy conservation. Eco-options for escalators and elevators to reduce operating costs.

Guidance. Elevators with voice announcements, disabled-friendly operation and infotainment systems.

Prestigious design. Escalators and elevators can be custom-designed, including illuminated escalators.

Worry-free modernization. From complete replacements with minimal building adaptation to tailored phased modernization, we ensure maximum traffic capacity with minimum disturbance during modernization work.

Products and packages

Tailored for retail operations

Schindler 3000

Our passenger elevator with outstanding flexibility for residential and up to mid-sized commercial buildings

Capacity	340-1360 kg
Travel height	Up to 80 m

Schindler Plan & Design tool

Design your elevator layout in minutes

Our easy-to-use online planning tool makes it simple to find the matching vertical transportation setup for your building. The Schindler Plan & Design tool helps you to prepare specifications in the early stages of your building's project life cycle.

With just a few clicks, we provide you with recommendations, a comprehensive product specification, and detailed layout drawings. Simply download the data straight into your project design in DWG or PDF formats.

The solution can be integrated with Building Information Modeling standards, and our Project Cloud makes it easy for you to share your projects with us.
